PRODUCT HIGHLIGHTS

BuffaloCrete Construct Ltd.

BLOCKS | PAVERS | CEMENT | MACHINERY | REAL ESTATE

Buffalo's strength, remarkable quality

- *Popular Blocks: Our Popular blocks are made with cement and quality aggregates. They have a crushing strength of 2.8 N/mm². They come in 6 and 9 inches sizes.*
- *Standard Blocks: Our standard blocks are machine vibrated and made with a granite dust heavy mix. They have crushing strength of 3.8 N/mm².*
- *Unique/Peculiar Blocks: Our Special Blocks are machine vibrated and made with a mix of sand, granite dust, cement and concrete admixture. They have a crushing strength of 5-7 N/mm² and are produced on special request.*

PRODUCT HIGHLIGHTS

- The Lock 'n' Align concrete blocks have been designed to optimize time, effort, materials and finance, thus saving as much as 40% - 60% of the cost of walling in a building project. The efficiency of the Lock 'n' Align block is easy to understand because the benefits are so striking and visible. They interlock and self-align, speed up the block laying process and saves time, cheaper to lay, hardly allow errors in block laying, automatically maintains straight level in laying the blocks, windows and doors are automatically maintained on a straight line.
- Lintel Blocks are innovative and saves time, materials and cost of constructing lintels in buildings. With the use of lintel blocks, form- works are reduced to barest minimum or even discarded. Lintel blocks serve as the form-work into which the rebars are fitted and concrete poured, thus saving a lot of cost.
- Lebanese Block: This variant of concrete hollow blocks which originated from Lebanon hence the name has all the advantages of concrete hollow blocks and also has a higher compressive strength, better acoustic and thermal Insulation, better impact resistance, and higher load bearing capacity

PILLAR AND DECKING BLOCKS

BuffaloCrete Construct Ltd.

BLOCKS | PAVERS | CEMENT | MACHINERY | REAL ESTATE

Buffalo's strength, remarkable quality

- **Pillar Blocks:** BuffaloCrete Column/Pillar Blocks come in (a) Open type and (b) Closed type. Both are excellent replacements for form-works in constructing columns in a building. They create at a cheaper and faster rate the same room that form-works create which will inhabit reinforcement and be filled with concrete to form a pillar. The column Blocks are laid vertically on top of each other to create a pillar to support a building or wall.
- **Decking Blocks:** BuffaloCrete decking Block reduce the weight of decking/floor/concrete slab by creating hollow core within the floor. This is done by arranging different ridges of the hollow decking concrete blocks longitudinally while creating spaces in between the ridges in which reinforcements will be placed and filled with concrete, thus creating a rigid beam that will hold the floor. These decking blocks save about 40% of total concrete cost of a decking

KERBS AND PAVERS

- Kerbs: Our Kerbs are made with cement and good aggregates. They are made from a steel mould, which gives it a regular shape. They are strong and suitable for road construction, landscaping, and gardening
- Pavers: Our pavers are built from quality concrete mix, and are suitable for all manner of outdoor use. They are an ideal choice for patios, pathways, courtyards, walkways, roads and the likes. They come in 6cm and 8cm sizes.

Our Wheelbarrows are well-balanced and extremely strong and can perform admirably in all sectors for various uses such as, concrete, building and construction industries, metal and fabrication activities and so on. The Big-John and low-John wheelbarrows are 170-litre and 95-litre respectively. The Big-John is strong and durable with a bigger bucket for industrial usage. The Low-John is constructed to be wide and low, this enables it to carry heavy goods without the risk of tipping and falling. The High John and the Long -John wheelbarrows are 65-litre and 70-litre respectively

*Big John
Wheelbarrow
Capacity: 170 liters*

*Low John
Wheelbarrow
Capacity: 95 liters*

*High John
Wheelbarrow
Capacity: 65 liters*

*Long John
Wheelbarrow
Capacity: 70 liters*

Our set of highly durable and efficient machinery are top class and in a world of their own. Strong durable block moulders (2 pole & 4 pole moulders), they are the top choice for moulding strong quality blocks.

Two Pole Molder

Our mechanical scissors grabs can lift up to a 1 ton of load and they are very strong, safe, efficient and rugged.

We also supply quality granites and cement. As a major cement distributor, we are capable to deliver your orders on set time and in trucks.

Pan Mixer

High Quality Granite and Stones.

Client Testimonials

BuffaloCrete's pavers and kerbs have transformed our outdoor spaces. The variety of designs and colors available allow us to create stunning landscapes that leaves our clients thrilled with our delivery.

Chinonso Okonkwo: Real Estate Project Manager

BuffaloCrete offers exceptional value for money. Their products are competitively priced without compromising on quality, making them the smart choice for any construction project.

Aliyu Ibrahim: Property Developer

BuffaloCrete has been our trusted partner for years now. Their consistent quality, reliability, and dedication to customer satisfaction makes them an invaluable asset to our business.

Tunde Adeleke : Civil Engineer

I never believe concrete blocks can be made so strong that they don't break, even when tipped, and at a large quantity. I used BuffaloCrete's concrete blocks, Pavers and Kerbs for my building. Its over 10 years now, and I have no regret whatsoever. Keep it up BuffaloCrete.

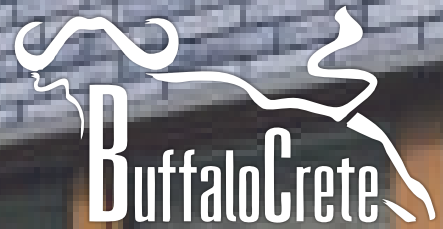

Agbogunleye O: Home Owner, UK
